

RIVA  
S P A I N

LUXURIOUS CONNECTION TO NATURE

## *A Family History*

Our journey began in **1937 in Vigo, Spain**, where the Iglesias family started their wood craftsmanship in a small workshop. **Over the past eight decades**, this small workshop has grown into **one of Europe's most esteemed wood manufacturers**, meticulously refining every stage of our production process to ensure **the highest quality products**. Today, we **proudly operate** the most **exclusive showrooms in the industry**, with over **100 stores across the United States**.

## *Our Purpose*

We exist to **elevate lifestyle, wellbeing** and relationships by providing people a **luxurious connection to nature**.

## *Our Vision*

**Transform the flooring industry** worldwide by **elevating quality, design and customer experience**, using natural elements.

## Engineered Hardwood Floors

RIVA Spain crafts high-end, sustainably-minded flooring solutions from **100% European White Oak** for residential and commercial spaces. With a Marine Grade **Baltic Birch core** and **6 layers of BONA® finish** for maximum protection, our cutting-edge products are made in our **FSC-certified factory in Spain** and are completely **VOC-free**.

*12 Colors | 4 Widths | 2 Grades*

Collection	Width	Colors	Thickness	Top Layer	Length	Grade

# *Sustainability* is our Priority

## **Why Engineered Wood?**

Engineered wood floors feature a layered design that maximizes White Oak top layer while using abundant wood species for the core, reducing resource demand and supporting sustainability without sacrificing beauty or durability.

## **Responsible Forest Management**

RIVA Spain floors are sourced from responsibly managed forests that prioritize regeneration, preservation, and ecological balance. By choosing wood certified by sustainable forestry organizations, we support practices that protect forest ecosystems and ensure a renewable supply for future generations.

## **Crafted To Last**

Designed for resilience, engineered wood is highly durable and resistant to environmental changes. This longevity means less waste over time, providing a sustainable flooring solution that not only looks beautiful but also stands the test of time, reducing the long-term demand on natural resources.

We are certified with the strictest environmental standards and our raw materials are selected and chosen by experts
